WORK EXPERIENCE

Caretaker Technologies

Software Engineer (Frontend)

April 2022 - Present

- Designed, developed, and tested UI for mobile and web applications with nextjs, react, react-native, tailwindcss and typescript.
- Developed and implemented highly responsive user interface components using react concepts.
- Developed and implemented front-end architecture with nextjs, redux, redux-toolkit and typescript to support user interface concepts.
- Monitored and improved front-end performance.
- Documented application changes and ui components with storybook and developed updates.
- Tested and validated all work generated during the development process with jest and playwright to ensure optimal functionality and performance.

Escroo Africa

Frontend developer

October 2022 - February 2023

- Led the development team at Escroo Africa, an escrow payment platform, driving the creation of innovative solutions that ensured efficient and secure transactions.
- Developed and implemented highly responsive user interface components using react concepts, tailwindCSS.
- Developed and implemented front-end architecture with react, react-router redux, react-query, axios and typescript to support user interface concepts.
- Monitored and improved front-end performance by bundle size optimisations and implementing best practices for code splitting

Skrind.ng

Frontend developer (Vue.js)

February 2022 - April 2022

- Optimised the website design for Skrind.ng
- Implemented the administrative dashboard user interface and functionality with Vue3 and Sass.
- Optimised table rendering issues by implementing server-side pagination and preventing dumping of massive data at once on the client

Freelance Developer

Web developer

December 2020 - Present

- Implemented the online Pharmacy and E-commerce store for Caremax Pharmacy in Wordpress
- Designed and implemented a seamless administrative panel and dashboard in Next.js
- Worked at ReactHQ as a technical Fellow, I designed the curriculum for the web development track and was the tutor for over 200 students on HTML, CSS and JavaScript.
- Worked as the solo frontend developer for developing the MVP for Shops Africa. Implemented the website and web application with React, JavaScript, Styled Components and Custom CSS.
- Improved website performance and user experience on the web app by improving load times and optimising static assets on the web app.

PROJECT

JSX Email

September 2023 - Present

- Co-maintainer for the JSX-email project
- Improved the developer experience for contributors to the project packages

Md-to-react-email

May 2023

•

Created and actively maintaining the md-to-react-email package
(<https://www.npmjs.com/package/md-to-react-email>)

- Contributor to the react-email project and @react-email/markdown package

Codeskills

January 2022

- Provided expert guidance and mentorship on front-end development, imparting invaluable knowledge to individuals in need of technical assistance.
- Provided technical articles to breakdown advanced concepts to the level of understanding of the community members on the Codeskills Blog
- Prepared community members for interviews by imparting essential industry insights and conducting targeted practice sessions, resulting in their enhanced confidence and improved performance.
